OUTER REEF YACHTS

Over the years, Outer Reef Yachts has earned the reputation of standing out among the competition, by standing for something different: consistently placing the customer first while providing the most Avant-guard trends in blue water, long range motoryachting. For this, Outer Reef has evolved from a mere brand to the most respected collection of robust, stylish, and adventure-ready long range motoryachts.

PMM: Can you describe the capabilities that make your vessel an ideal platform for long distance cruising?

OUTER REEF: First and foremost, Outer Reef Yachts are ruggedly built for long distance cruising and to consistently withstand the fury of Mother Nature. Built to Ocean, Category A Standards, “Unrestricted Navigation,” for stability and safety, the owners of an Outer Reef can rest assured they will arrive to their destination in safety and comfort. In addition, the Outer Reef Yachts shipyard is ISO 9001 (International Organization for Standardization) certified, which guarantees the highest quality design and control measures.

PMM: Considering the time spent aboard for those who are cruising extended distances, what amenities and safety features have you included to make distance cruising as enjoyable and comfortable as possible?

OUTER REEF: The signature of an Outer Reef is her whisper quiet ride, even below decks. All engines and equipment are softmounted to eliminate vibration and noise, including a well-insulated engine room with multiple layers of sound-deadening foam.

PMM: Any stories of your customers voyages where your vessel proved worthy of the aforementioned capabilities and features?

OUTER REEF: The most valuable testaments to Outer Reef Yacht’s quality and reliability are those from the Outer Reef owners themselves: “We transited during a very strong cold frontal passage with wind gusts as high as 49 knots. Seas built very quickly to 7 to 9 feet with sustained winds of 30 to 35 knots. The 630 Outer Reef showed no flaws in terms of her sea keeping, regardless of the point of sail. The experience was almost surreal. The boat just moved through the turbulence with sure footed stability. Now I know from experience how stable she is and should the unexpected happen, the boat can handle it.” – Les and Diana, Owners of a 630 Outer Reef Motoryacht.
